PRODUCT CATALOG / MADE TO SPECIFICATION

Coated & Anodized Aluminum

Pre-painted aluminum coil, painted gutter coil, thin-gauge coated coil and anodized aluminum sheet or coil. Built around your application, forming process and acceptance requirements.

Four product families. One specification-led order process.

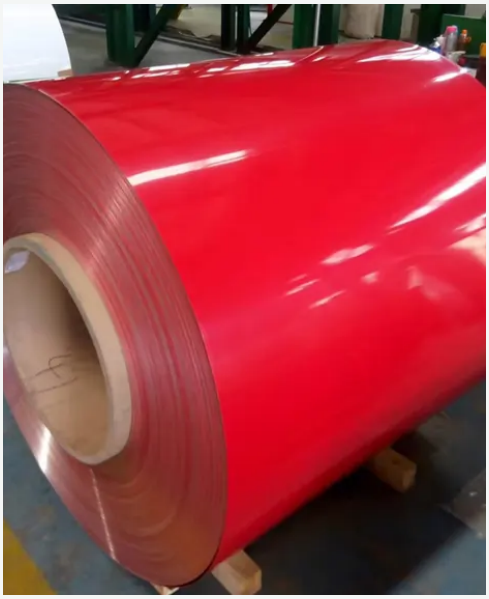

Tell us the end use, material and finish, dimensions, quantity and destination. Our team will prepare a written quotation with the agreed production, inspection and packing requirements.

Product images show PUYU products and production. Order-specific appearance and performance are confirmed by the approved sample and written order.

PRODUCTS 01-02

Color-coated aluminum coil

For roofing and rainwater applications. We align the coating and coil geometry with the forming equipment and exposure conditions.

01 / ROOFING

Pre-Painted Aluminum Coil for Roofing

For standing-seam roofing, flashing and roll-formed building components.

ORDER OPTIONS

Alloy and temper, PE or PVDF coating, color, gloss, thickness, width and coil dimensions.

FOR A QUOTE

Roof profile, end-use climate, target specification, annual or order quantity and destination.

02 / RAINWATER

Painted Aluminum Gutter Coil

Parent coil or slit coil for seamless gutters, downpipes and exterior trim.

ORDER OPTIONS

Coating system, color, metal gauge, slit width, core, coil weight and edge quality.

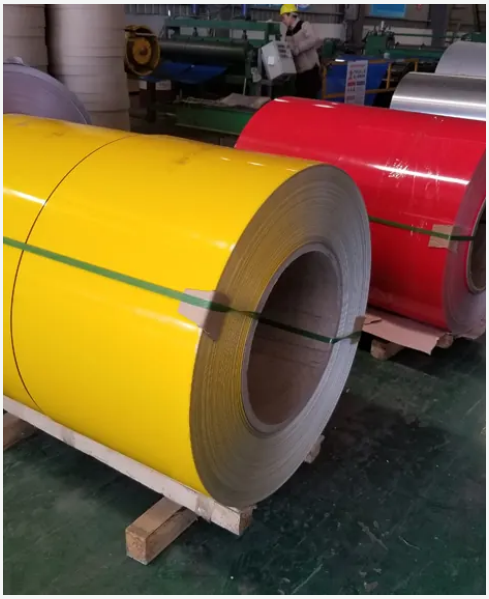

FOR A QUOTE

Gutter machine feed width and profile, desired finish, quantity and shipping destination.

PRODUCTS 03-04

Fabrication & surface finishes

Thin-gauge painted coil and anodized sheet or coil for downstream processing and architectural or industrial finishes.

03 / FABRICATION

Thin-Gauge Color-Coated Aluminum Coil

For ACP skins, ceilings, shutters and continuous fabrication.

ORDER OPTIONS

Alloy, temper, gauge, width, coating, color, surface and coil handling requirements.

FOR A QUOTE

Downstream process, bonding or forming requirements, target size and quantity.

04 / ANODIZED

Custom Anodized Aluminum Sheet & Coil

Clear, colored, brushed or embossed finishes for architectural and industrial use.

ORDER OPTIONS

Sheet or coil form, alloy, surface appearance, anodic film, sealing and size.

FOR A QUOTE

Application, finish sample or visual standard, required tests, size, quantity and destination.

RFQ & ORDER FLOW

From RFQ to shipment

01 DEFINE

Application, drawing or approved sample; alloy/temper; thickness, width and tolerances.

02 FINISH

Coating or anodized finish; color, gloss, film requirements and acceptance method.

03 LOGISTICS

Quantity, core/coil weight, packing, trade terms and destination port.

04 CONFIRM

Written quotation confirms the exact specification, sample, inspection plan and lead time.

Send your RFQ to the PUYU sales team

Include your product use, required specification, quantity and destination. We will return a quotation based on your actual order requirements.
